- Elastic bands

SUGGESTED HAIR COLOR FORMULA

- Prelighten/highlight to a level 9 using SynchroLift® + 20 volume Paul Mitchell® Cream Developer
- Tone and refine with **shines XG**® 8WB + 5 volume Paul Mitchell® Cream Developer

PREP

1. Cleanse the hair with Super Skinny Daily Shampoo and condition it with Super Skinny Daily Conditioner.
2. Apply Super Skinny Serum to the mids and ends, then blow-dry it in.

HOLIDAY STYLE

1. Apply more Super Skinny Serum to the ends when they're dry. Using the Neuro Grip and the Express Ion Round XL, work it through the hair to create smoothness and definition.
2. Create a zigzagged center part down the middle from the forehead to the high occipital/low crown. From there, section the hair horizontally to the tops of both ears. Clip away.
3. On the guest's right side, split the segment horizontally into 2 equally dense sections. Clip away the bottom section.

4. Mist the top section with Hot Off The Press and part it into 4 even pieces. Create a 4-strand braid and slightly overdirect the hair forward, toward the face. Transition it into a 3-strand braid if a piece becomes too short. Tie the ends with an elastic band.
5. Compress the braid, place a ProClip at the base, and stamp it with the Neuro Style at 350 degrees. Clip the braid up out of the way to cool. **Key points:** In order to compress the braid, push the hair closer toward the scalp (this will create a more intricate wave and bend) and use the ProClip as a stopping point for the Neuro Style.
6. Start again in the section underneath the braid, mist it with Hot Off The Press, then create a 4-strand braid. Place a ProClip at the base and stamp it with the Neuro Style. Clip it away to cool.
7. Move to the guest's left side and repeat steps 4 and 5 on these 2 sections.

8. In the bottom back section, mist with Hot Off The Press, create a 4-strand braid, and tie it at the ends. Clip it at the base, compress the braid, and stamp it with Neuro Style. Let it cool.
9. Once all the braids have cooled down, begin removing the elastic bands. Brush out the texture with your fingers as you go.
10. Complete the look with a mist of Hold Me Tight for flexible hold.
