- Elastic bands

SUGGESTED HAIR COLOR FORMULA

1 oz. (30 ml) **the color XG®** HLA (12/1) +
2 oz. (60 ml) 40 volume Paul Mitchell®
Cream Developer

PREP

1. Cleanse the hair with Extra-Body Daily Shampoo and condition it with Extra-Body Daily Rinse.
2. Apply Extra-Body Daily Boost to the guest's base and Thicken Up through the mids and the ends.
3. Flat wrap directional blow-dry the hair using the Neuro Dry and the 413 Sculpting Brush.
4. Follow the blow-dry with a heavy mist of Dry Wash to add texture.

HOLIDAY STYLE

1. Section a top segment from recession point to recession point, then roll it up to set it in a clip. Divide the hairline sections from the middle of the ear forward. Clip away.
2. Section by section, mist the entire top segment with Hot Off The Press.
3. Divide the top segment into 4 subsections using the Neuro Unclipped Styling Rod. Wrap each section up away from the face and clip it to cool. **Key point:** Make sure to ribbon the hair flat around the Styling

4. In the back, start making a high ponytail at the high crown. Collect the hair section by section, controlling it with the 413 Sculpting Brush, to make a clean ponytail. Insert the anchored elastic band.
5. Tie an elastic band ½" down from the ponytail base. Continue this technique 3 times to give structure and stability to the ponytail. **Key point:** Slightly overdirect forward while tying the elastic bands so that the end result stands straight up at 90 degrees.
6. Insert 3 bobby pins vertically through the top elastic band to give the ponytail additional support.
7. On the guest's right side, take the front section and backcomb it underneath. Smooth this section and clip it down by the base of the ponytail. Wrap the hair around the ponytail base and place a bobby pin to secure it. Repeat this on both sides.

8. Mist Hot Off The Press all over the ponytail before splitting it into 2 sections. Wrap each section around the Neuro Unclipped Styling Rod and clip it to cool.
9. Remove the clips from the top segment and dress it out with the 413 Sculpting Brush. Smooth the edges of the top with a Teasing Brush. Use the tail to position and define the wave when placing it. **Key point:** Dress the top to the right (opposite of the direction it was set) for added volume. Backcomb it for additional stability, then spray it with Extra-Body Finishing Spray. Shape and sculpt the wave according to the guest's suitability and balance.
10. Weave in bobby pins to anchor and secure the top wave.
11. Wrap the hairline and neckline wisps around the Neuro Unclipped Styling Rod for added texture. Mist the hair with Extra-Body Finishing Spray and smooth it with a Teasing Brush.
